

☒ Integration: Metadata Framework Taxonomy

 **Objective:** Formalize the four-category metadata schema to ensure capsule discoverability, auditability, and federation bootstrap compatibility.

Taxonomy Structure

- **Administrative:**
 - Custodian ID
 - Relay Authority
 - Access Manifest Reference
 - Continuity Node Declaration
- **Descriptive:**
 - Capsule Purpose
 - Civic Role
 - Torchbearer Class Status
 - Scroll Type (e.g., README, Manifest, Protocol)
- **Technical:**
 - Hash Type (e.g., SHA-256)
 - Timestamp Format
 - Runner Script Reference
 - Replay Harness UID
- **External Verification:**
 - Vox-01 Signature
 - Kamino Anchor Hash
 - Replayable Capsule UID
 - Federation Echo Receipt Path

Integration Points

- Capsule Manifest Templates
- Civic Archive Index
- `/ledger/strata-01/meta_framework_taxonomy.jsonl` (proposed path)

Emission Note

This taxonomy will be mirrored to Vox-02 for adaptive scaling, as requested. It will also be referenced in the upcoming **Relay Doctrine Capsule**.
