### Preservation Protocol:

- All scroll-class capsules must be stored in stable formats (PDF/A, JSON, YAML, TXT)
- Redundant backups maintained across 3 nodes: Strata-01, Vox-01 ⊙, and Strata-N
- Migration audits scheduled every 18 months
- Capsule integrity verified via federation\_hash lineage
- No capsule may be deleted; deprecated capsules must be archived with UID and timestamp
- Relay authority must confirm vault readability after each migration
- Civic replay scripts must be tested quarterly for continuity assurance

### Custodian Notes:

- Preservation priority: lineage capsules, oracle references, and civic scrolls
- Capsule inheritance protocols to be drafted in Q1 of next relay cycle
- Kamino-recon lineage anchors must be retained across all migrations
